

# MANUAL BENDING

MACHINES FOR UNIVERSAL SHEET METAL PROCESSING  
AT JOB SITES OR ON THE SHOP FLOOR

# WE TRULY GO THE DISTANCE TO HELP YOU GET AHEAD

PIONEERING SPIRIT AND INNOVATION.  
BORN OF PASSION FOR THE SHEET METAL TRADE.

### WE PLACE A HIGH PRIORITY ON THE SUCCESS OF OUR CUSTOMERS.

At Schechtl, we aim to find ideas and solutions that make life easier for those who work in the sheet metal trade.

And it's been this way since the very beginning. Since then, this aspiration has given rise to numerous innovations: from the invention of swivel bending technology to mobile data transfer for finished edge profiles.

Founded in 1910 as a simple smithing outfit and guided by loads of pioneering spirit, Schechtl now ranks among the world's leading manufacturers of swivel bending machines and squaring shears for the processing of thin metal sheets.

### THANK YOU FOR YOUR CONFIDENCE

Very high quality, incredible durability, and outstanding reliability – that's what generations of clients in Germany and abroad have said about our products. While we're extremely honored by these words, they also motivate us to keep our standard of quality at a high level.

That's why we not only invest in technology, but also in creating an atmosphere of positivity and trust as well as in the knowledge of our employees. Because ultimately, the thing that truly helps a business get ahead is the commitment and competence of the people who determine its path. Satisfied employees are more committed, a fact that our customers can observe daily.

### LOYALTY COUNTS

We take our seal of quality ("Made in Germany") very seriously. We produce and assemble all of our machine parts exclusively in Germany. Our commitment to our location is also particularly evident in our close, longstanding ties to partners and suppliers in the region.

Schechtl is a family business, owner-operated for over 100 years and now in its fourth generation.

A combination of healthy growth and strong economic stability means that our corporate development strategy is geared towards the long haul.

*Maria Schechtl*

Maria Schechtl  
Managing Director

# PRODUCT FINDER

THE RIGHT COMBINATION OF WORKING LENGTH, BENDING CAPACITY  
AND DEGREE OF MOBILITY WILL HELP YOU FIND THE MANUAL BENDING  
MACHINE TO SUIT YOUR NEEDS.

1. HOW OFTEN DO YOU PRODUCE CLOSED FORMS, BOXES, CASSETTES AND THE LIKE?

2. WHICH MAIN TYPES OF WORK DO YOU MAINLY DO AT JOB SITES?

3. WHICH TYPES OF BENDING ARE REQUIRED ON THE SHOP FLOOR?

4. WHAT MATERIAL TYPES AND THICKNESSES DO YOU MOSTLY PROCESS?
- Specialist for manual segment bending: → **TBS, UK, UKV** and **UKF** (pages 13 – 19)
  - When mobile bending is required: → **LBX, TBX, LBT, TBS** (pages 7 – 13)
  - Multi-talented models for single-piece construction and small series: → **UK, UKV, UKF, SB, KS, KSV, HBM** and **HA** (pages 16 – 23)
  - Compare with the product finder, the range of accessories and the technical specification (pages 24 – 29)

Areas of application	Job site				Segment bending				Shop floor			
	LBX	TBX	LBT	TBS	UK	UKV	UKF	SB	KS	KSV	HBM	HA
Machine type												
Working length												
2x550								1.00				
1040		0.80		0.63	1.50	2.00	1.50		2.00			3.00
1250				0.63	1.25	1.75	1.50					
1290			1.00									
1540						1.50	1.50		1.50			2.50
2040	0.63					1.00	1.00		1.00	1.50		2.00
2540	0.63									1.00	1.00	1.50
3100	0.63										1.00	1.50
4040												0.80
Bending capacity for steel 400 N/mm²												

### JOB SITE

Sturdy packages, mobile and versatile. For universal use at the job site.

### SEGMENT BENDING

Complex forms, lighter than ever before. Intelligent segment bending. Easy and saves time.

### SHOP FLOOR

Extraordinary bending performance without electrical current. Huge amount of free space for daily requirements on the shop floor.

*Taken care of it on the spot:  
better to be repaired while on  
building site than long trips  
back and forth*

*Brilliant linings that you'll  
want to show off - attractive  
and noble eye-catchers*

LBX

TBX 100

## MASTERFUL MOBILE AT THE JOB SITE

THE MOBILE DEVICES FOR YOUR JOB SITE MANAGE THE TRICKIEST  
BENDS AND SAVE YOU EXPENSIVE TRIPS TO THE SHOP FLOOR.

*No sheet at the job site  
remains unprocessed -  
excellent work starting  
with the foundation*

*The small device can be taken  
along anywhere: bend sheets directly  
on the construction vehicle -  
fits always and everywhere*

# PASSION AND DEDICATION FOR YOUR SUCCESS TECHNOLOGY WITHOUT FRILLS

THIN SHEET METALWORK PROFESSIONALS IN INDUSTRY  
AND TRADE WILL FEEL AT HOME WITH THESE MANUAL DEVICES.

## "MADE IN GERMANY" QUALITY - ONLY THE BEST FOR YOU

From "manual" to "motorized", sheet metal workers appreciate our consistent orientation to their requirements.

A source of great pride for us: established sheet metal workers and founders of companies go to us to find the most extensive and consistent range of bending machines on the market. Take advantage of our dedication at your job site or on your shop floor.

## YOU CAN USE OUR MACHINES FOR THIS AND SO MUCH MORE:

- roofs and exteriors
- wall paneling
- doors, window frames and window sills
- roof gutters and discharge pipes
- machine housing and components
- furniture and shelves
- advertisement boards and light heads
- ovens, air conditioners and boiler coverings
- restaurant and kitchen devices
- transport and technical equipment
- installations for special vehicles
- vending machines
- elevators and staircase paneling
- and much more...

## WE HAVE ALWAYS FIRST ASKED OUR CUSTOMERS WHAT THEY NEED

### And this is what has come of it:

- one-man operation on every machine – it saves you from expending too much energy and protects your health at the same time
- sturdy steel construction guarantees an extra long machine life
- quick and lively technology will save you time, making you more economical in the long-term

- maintenance-free bearings ensure that everything runs smoothly
- stability down to the last detail - you can rely on it
- high-quality accessories make work much safer and more comfortable
- and much more...

The list of our passions is in every Schechtl machine. It has only one goal: Your long-term success.

# PROFILE RAILS FOR MANUAL BENDING MACHINES

THE RIGHT RAIL FOR ANY CHALLENGE.

## SHARP RAIL 66/24 20°

## SHARP RAIL 66/24 20°, OFFSET

## SHARP RAIL 66/24 45°

## SHARP RAIL 66/24 45°, OFFSET

## ROUND RAIL 66/24 R = 1 - 12

## ROUND RAIL 66/24 WIDE, OFFSET

## SHARP RAIL 20° R = 1 / R = 2 (LBX)

## ROUND RAIL R = 2 / R = 2.5 (LBX)

# THREE STRONG MODELS FOR YOUR JOB SITE

LONG. LIGHT. HIGH-PERFORMANCE.

## TOP VALUES FOR CEILINGS AND EXTERIORS

The three **LBX models** are perfectly suited for 90% of all manual bending work on ceilings and exteriors. All three machines achieve identical, optimal bending values for every type of material. All you need to do is to decide which working length is ideal for your requirements.

covers  
**90%**  
of all manual  
bending work

## BENEFITS

### THE PRINCIPLE OF STURDY LIGHTNESS

- Technology you can count on:**  
Technology from Schechtel is always economical, durable and convenient.
- user-friendly:  
1 worker is enough to execute all bending work in an ergonomically safe manner and with professional precision with the **LBX models**.
  - easy to carry:  
2 workers are enough to move the **LBX 200/250** to a new location at a job site – no crane needed.

### TECHNICAL FEATURES OF THE LBX 310

#### HERE YOU CAN SCORE POINTS WITH LENGTH

- If you want to process thin sheets with 3 meters of working length, use the **LBX 310**. This model is optimally equipped as a central bending station at the job site. And, like the smaller devices, it achieves optimal bending values with different materials and material thicknesses.
- **The obvious decision for 3 meter folds at the job site.**

## TECHNICAL FEATURES

### ALWAYS HAVE EVERYTHING YOU NEED AT THE JOB SITE

- weight balancing of the clamping beam
  - smooth and efficient operation
  - holds the clamping beam up at every opening height
- bending beam with manual crowning system – good, uniform bending result throughout the entire working length
- upper rail can be exchanged for different materials and material thicknesses
- wear- and maintenance-free roller bearings
- optional:
  - back gauge 500 mm or 750 mm with back gauge stop bar
  - roller shear
  - rolling unit and rods with different diameters and lengths

### TECHNICAL FEATURES OF THE LBX 200 AND LBX 250

#### HERE YOU CAN SCORE POINTS WITH FLEXIBILITY

- **LBX 200 and LBX 250** are optimal prepared for various locations at the job site.
  - machine support stands
    - standard support stand with steerable wheels for convenient transport at job sites
    - available also with short "feet" (truck support stand) – ideal for installation on a work bench or in a construction vehicle
- a two-person job – that's all you will need to move the machine around the job site without any extra tools

# LBX 310

# LBX 200 • LBX 250

# SUITABLE FOR EVERY JOB SITE

MAXIMAL MOBILITY. EXTREMELY LIGHT. READY TO USE IN SECONDS.

## USE

### QUICK AND EASY IN THE RIGHT PLACE

- ideal for frequently changing job site places
- ideal for work in upper floors
- ideal for work on ceilings and scaffolding
- ideal for one-day job sites

## BENEFITS

### LIGHT AND FLEXIBLE

- Lightweight for the job site, can be carried by one worker
- The **TBX** (without X-shaped support stand) can be installed on a workbench or in a construction vehicle
- Foldable X-shaped support stand with wheels and handle (available as an option)
- Set up – secure – you're ready to go
- Attachable roller shears (optionally available)
- Durable steel construction – optimally suited for everyday work at the job site
- Clamping pressure adjustable – good, uniform bending throughout the entire working length

## TECHNICAL FEATURES

### AS PERFECT AS THE LARGER MODELS

- bending beam with manual crowing system – always the right pretension for the material and material thickness
- wear- and maintenance-free roller bearings

## USE

### ALWAYS IN USE WHERE THEY ARE NEEDED

- ideal for frequently changing job site places
- ideal for one-day job sites
- ideal for sites that change on short notice
- ideal for work in upper floors

### VERSATILE, FLEXIBLE AND MOBILE

The **LBT 125** is also a lightweight – it only weighs 85 kg including the machine support stand and rolling unit. It can therefore be moved around the job site easily and is as sturdy as a larger model.

## BENEFITS

### MOBILE, VERSATILE, CONVENIENT

- flexible for switching sheets – sharp rails can be exchanged in the clamping beam
- clamping pressure adjustable – uniform bending result throughout the entire working length
- smooth operation due to weight balancing of the clamping beam
- machine support stand can be removed for convenient transport
- steerable wheels with stop mechanism - stable thanks locking lever

## TECHNICAL FEATURES

### BENDING, CUTTING AND BEADING – ALL IN ONE MACHINE

- different sheet thicknesses possible – clamping beam rail can be exchanged
- bending beam can be lowered, pretension can be adjusted
- rolling unit
- rolling rods (optionally available)
- roller shear (optionally available)

# TBX 100

TBX with foldable X-shaped support stand (optionally available)

# LBT 125

# CLEVER SEGMENT BENDING – COMPLEX FORMS MADE EASY

EASY AND SAVES TIME. NO TOOLS NEEDED.

## BENEFITS

### COMPLEX FORMS MADE EASY - IN ONE WORK CYCLE WITHOUT CONVERSION TIME

Segment bending machines are equipped with segmented rail system. The bending rail consists of individual segmented tools. Clever combination and the free space between the segmented tools make it possible to bend workpieces on all sides. You can use it to produce tricky and complicated forms quickly and easily.

You can lay out several segment stations next to each other and implement successive work steps rationally and without conversion time, all in one machine and in one work cycle.

### THE QUICK CLAMPING SYSTEM INCREASES PRODUCTIVITY IN SECONDS

The manual bending machines from Schechtl are equipped standard with the patented quick clamping system on the clamping, lower and bending beam. The concept makes it very simple to rearrange tools. Tried and tested thousands of times in practice. As you neither need tools or screws, you gain valuable time and increase productivity.

### THE VARIETY OF FORMS IS ENORMOUS

Elaborate box forms, special forms, samples and window sills are easy to produce in an efficient way.

# MOBILE LIGHTWEIGHT AT THE JOB SITE

AGILE AND MOBILE. EASY HANDLING.

## BENEFITS

### BOXES, CASSETTES AND THE LIKE IN ONE WORK CYCLE

- rational and productive – all segments can be adjusted without tools
- The **TBS** masters even 25 mm and 35 mm rollformed seams for eaves and ridge folds
- with the **TBS**, sheet metal workers avoid any "surprises" at the job site and can work completely self-sufficiently in profile production

## CONVENIENCE

### EFFORTLESS ON THE JOB SITE

- 1 worker alone can easily transport and operate the **TBS**
- The **TBS** (without X-shaped support stand) can be installed on a workbench or in a construction vehicle
- Foldable X-shaped support stand with rollers and handle (available as an option)
  - Stable and convenient to transport
  - Simply pull it behind you like a roller suitcase
- Reduce transport weight – segments are transported in a separate box where they are stored safely and optimally protected

## TECHNICAL FEATURES

- all beams have 40 mm free space of movement
- the clamping beam only has a 45 degree flat slope – this offers additional free space for refined seamed profiles with long limbs
- the roller shear is a useful accessory for cutting sheets directly on the machine (optionally available)

### TRANSPORTABLE. JOB SITE. SEGMENT BENDING.

Your area of application spells out the **TBS**. The smallest of the manual segment bending machines in the Schechtl range is huge when it comes to its flexibility on the job site.

Thanks to its small dimensions, you can easily move the **TBS** on the job site, as well as between floors, on scaffolding and in small areas.

# TBS

TBS with foldable X-shaped support stand (optionally available)

*It's been in business for a long time – no other can challenge it. Its specialties are special forms and anything round*

*Really sharp so you can cut well before bending*

*It takes care of all boxes and cassettes and feels at home in any special segment*

## EXTREMELY FLEXIBLE ON THE SHOP FLOOR

EVERYTHING A SHEET METAL WORKER'S HEART DESIRES. FROM SIMPLE TO TRICKY – YOU CAN GET THE PERFECT FORM WITH OUR MANUAL DEVICES.

# TWO, WHO LIKE TO SHARE - STRONG SPECIALISTS FOR THE SHOP FLOOR

THE SPECIALISTS FOR TRICKY TASKS.

SEGMENT BENDING

SHOP FLOOR

## HIGH QUALITY FOR SPECIAL FORMS

Two manual bending machines master tricky special designs as well as everyday supplemental bends on workpieces, boxes, cassettes requirements.

The **UK** and the stronger **UKV** are your specialists for closed special forms. The segments are cleverly positioned, and several work steps are completed without conversion time. The rational work flow is maintained while conversion of the motorized machines becomes unnecessary.

The **UK** and **UKV** are ideal for single-piece production and small series as well as prototype construction in the trade sector.

proven  
10.000  
times

## BENEFITS

### ADJUSTMENT WITHOUT TOOLS - A HUGE ADVANTAGE FOR SAFETY, PRECISION AND SPEED

- clamping, lower and bending beam with patented quick clamping system is standard
- combine and rearrange any segments in a flash – without using tools and screws
- intelligent segment combination of several work steps can be executed in a rational manner without conversion time
- take out individual tools – this creates free space between the segments for closed workpieces

High clamping beam segments

Adjust bending angle with scale and lever

Use storage box as work surface (without back gauge)

## TECHNICAL FEATURES

### COUNTLESS PRACTICAL DETAILS MAKE EVERYDAY WORK EASIER

- Adjustments without tools – a huge advantage for safety, precision and speed.
- lower bending beam with hand wheel and scale
- set clamping beam pressure with a lever
- equipped with wheels, the **UK** (standard) and the **UKV** (optional) – can be set up at any point in your production
- standard foot pedal – hands-free work throughout the entire production process
- segments not currently in use can be easily stored in a storage tray located above the clamping beam
- the storage box for all segments is located in a space-saving location under the back gauge, or can be used as a tool tray in the standard model

## ACCESSORIES

### OPTIONAL ACCESSORIES

- high clamping beam segments 140 mm + 160 mm (**UK** + **UKV**) 180 mm (**UKV** only) (Standard = 100 mm)
- clamping bar segments with 2 mm and 3 mm radius, zinc and aluminum can be bent more gently due to the larger curve
- various back gauge systems
- inserts for producing windowsills
- roller shear
- wheels with chassis (**UKV**)

UK/UKV back gauge (aluminum T-slot)

UKV back gauge (spur rack)

# UK POWER

# UKV MORE POWER

# THE ONE WITH EXTRA HIGH SEGMENTED TOOLS – FREE SPACE XXL

DOUBLE AMOUNT OF FREE SPACE FOR LARGE SPECIAL FORMS.

## ALL THE QUALITIES OF THE UKV – ONLY MUCH BIGGER! NEW PEAK PERFORMANCE IN MANUAL SEGMENT BENDING.

The "F" stands for "flexible". With larger dimensions and countless benefits, the **UKF** is the perfect pick: the **UKF** has room for 160mm- and 180mm-high segmented tools on the clamping beam. The segmented tools of the lower and bending beam are 120mm-high, these are **100% more free space**. The working height was increased by 160mm compared to the **UKV**. Large-format sheets can be processed with better ergonomics.

### BENEFITS

#### SAVE MONEY AND MAKE PRODUCTION MORE CONVENIENT:

The extreme free space makes it possible for sheet metal workers to create larger closed forms. In addition, there is more flexibility and throughput in the workflow.

Higher segments are often special tools on other machines. What needs to be manufactured separately on those machines is standard with the **UKF**.

The **UA 125** universal back gauge table expands the spectrum for recurring profiles in particular. The back gauge table is equipped with wheels and can be used on several **UK** models.

### ACCESSORIES

#### OPTIONAL ACCESSORIES

- 180 mm-high segments for the clamping beam (standard = 160 mm)
- segments for the clamping beam with 2 mm or 3 mm radii, zinc and aluminium can be bent thanks to the larger curve
- **UA 125** universal back gauge table
- rolling device (wheels) for **UKF**

Special series in a work cycle, mobile **UA 125** universal back gauge table for sheet control

# UKF

# THE SHINGLE SPECIALIST FOR SMALL AND LARGE SERIES

FAST AND EFFECTIVE. BRILLIANTLY EASY.

SEGMENT BENDING

SHOP FLOOR

### BENEFITS

#### SHINGLES, RHOMBUSES AND THE LIKE ON TWO SIDES IN ONE OPERATION

- formats such as shingles or rhombuses can be processed in dimensions of 20 - 50 cm bending length
- special round rails with a 1.25 mm radius on both clamping beams enables the bending of hems in one operation

### CONVENIENCE

#### EASY OPERATION

- one worker alone can operate the machine through the unique bending beam segments with an ergonomic working height and practical foot pedal
- precise and repeatable positioning of the flat patterns with the standard back gauge
- due to the special design, 24 conventional working steps are reduced to only 8 – you save approx. 70% of your time

### TECHNICAL FEATURES

- two accurate 180° edges in one operation
- hems without additional pressing
- repeatable work processes with two bends on two sides in one operation
- 100 mm free space on upper beam with special round rails in radius 1.25 mm
- segmented lower beam with 20 mm free space

#### SERIES PRODUCTION IN THE SEGMENT BENDING FIELD

The advantages of the **SB** speak for themselves

- ✓ manually
- ✓ mobile
- ✓ cost-efficient
- ✓ repeatable accuracy

# SB

# DUO WITH EXTRAORDINARY CAPABILITIES

THE VERSATILE PROGRAM FOR CREATIVE PROFILES.

## IT BENDS AND BENDS AND BENDS KS – THE BEST-SELLING BENDING MACHINE IN THE WORLD

One device for all tasks. Profit from the many cutting-edge innovations from over 50 years of experience that are part of this machine. The KS model – from bending technology pioneer Konrad Schechtel – is the most popular classic device of all manual bending machines for the metal sheet work trade. Sheet metals workers swear on it. We would like to thank you for more than 25 thousand machines sold.

### BENEFITS

#### THE ULTIMATE MACHINE FOR SHEET METAL WORKER – SAVES COSTS DUE TO ITS VERSATILITY

- very individual and extraordinary profiles can be implemented for roofs and exteriors
- optimized for diverse materials and material thicknesses
- profiles with long limbs – the tried and tested principle of railroad tracks and additional lateral notches

#### EXTENSIVE ACCESSORIES

- special rails, offset rails, rolling unit and rolling drum can be used (optionally available)
- various back gauges for special requirements (optionally available)

### TECHNICAL FEATURES

#### ONE OF THE BEST ADJUSTABLE, MANUAL BENDING MACHINES ON THE MARKET

- maximum bending free space on the clamping beam
- adjustable pretension for maximal bending precision on the clamping and bending beam
- reinforced lower beam – best results during hemming

#### QUICKER AND MORE PRECISE WAY TO ACHIEVE RESULTS: ERGONOMIC, SAFE AND EASY

- high working comfort – back friendly working conditions
- very wide foot pedal made for hands-free work and a high operating safety
- clamping beam is driven via dual eccentric – extremely light weight and force balancing mechanism
- manual lowering and setting of clamping pressure

Winner of several awards!

# KS/KSV

KSV image

## ROUNDING

Production of discharge pipes ① and roof gutters ② very easy and right on the bending machine. To do so, rolling drum with different diameters are inserted into the special receptacle on the upper part of the machine support.

## BEADING

Reinforcement of workpiece ends and box forms by beading the edges. For convenient beading directly on the bending machine, the bending beam is first fastened on the machine support with a horizontal strut. Then the rolling unit is simply placed on the bending beam and locked on.

	ROUNDING			BEADING

# POWER – EVEN WITHOUT ELECTRICITY – FULL SPEED AHEAD

WELCOME TO THE BIG LEAGUES OF MANUAL BENDING MACHINES – YOU CAN'T GET ANY MORE WITHOUT A MOTOR.

## LARGE PLAYGROUND FOR SHEET METAL WORKERS, ROOFERS, EXTERIOR CONTRACTORS

Where it is impossible or inadvisable to use motorized machines, the **HBM** and **HA** are two particularly economic alternatives in the upper performance class of manual bending machines. You don't have to do without power, precision and variety of application.

### BENEFITS

#### THESE CHAMPIONS ARE REALLY TOUGH – TWO CONVENIENT ALTERNATIVES FOR APPLICATION WITHOUT LIMITS

- can be used anywhere without electrical connection
- wear- and maintenance-free bearings and guides

- can be used by anyone, nearly impossible to break
- one-man operation without expenditure of force

- workpiece clamping with large foot pedal – hands-free operation for triggering bending and a high level of operational safety

#### TECHNICAL FEATURES OF THE HBM

##### EXTREME FLEXIBILITY AT 3 METER WORKING LENGTH

- support grid with single stones – precise positioning of large-format workpieces
- snap-in bending angle – precise repeatable bending for small series and recurring single-piece production
- great free space on bending beam profiles with long limbs made easy
- all profile and insert rails can be exchanged on clamping,
- lower and bending beams - the right rail for every material
- simple bending beam adjustment with scale
- rolling unit (optionally available) – can be attached directly to the machine
- various back gauges (optionally available)
- roller shear **RSL** (optionally available)
- foot pedal

#### TECHNICAL FEATURES OF THE HA

##### PRECISE BENDS FROM 1 TO 4 METERS OF WORKING LENGTH

- specially designed for thick sheets and long working lengths
- extremely sturdy and powerful
- ideal for long and thick sheets in extensive exterior construction, particularly flat-roof construction
- tried and tested in repair work as well
- all bending rails can be exchanged – set to any material
- roller shear **RSL** (optionally available)
- foot pedal
- goats foot tooling (optionally available)
- various back gauges (optionally available)

## HBM POWER

## HA MORE POWER

ACCESSORIES

CONFIGURE YOUR BENDING MACHINE TO YOUR INDIVIDUAL REQUIREMENTS. THE OPTIONAL ACCESSORIES PROVIDE GREATER CONVENIENCE, PRECISION AND SAVE TIME AS WELL.

1 ROLLING UNIT

2 BACK GAUGE WITH SWIVELING FINGER

The manual back gauge is equipped with swiveling fingers and the support grid for large-format workpieces. It transports precise bends throughout the entire working length. Setting the bending length is done manually with the position wheel and measuring scale.

3 X-SHAPED SUPPORT STAND: MOBILE, FOLDABLE, ROLLABLE

4 ROLLER SHEAR HBM + HA/RSL

Simple and space-saving roller shear. The guide rods guarantee precise cutting throughout the entire working length. You can cut sheets directly on the bending machine. This model makes using shears unnecessary in individual cases.

5 ROLLER SHEAR

Roller shear for various manual bending machines.

6 FOOT PEDAL KS/KSV/HBM/HA

Safe and efficient bending, which saves a huge amount of work, especially with recurring bends. Triggering the bending process by pressing the large foot pedal – hands-free and very sturdy.

# LINE-UP OF MACHINES

MACHINES FOR THE ENTIRE  
RANGE OF TOP-QUALITY METALWORKING  
AS OF 01/2022

## MANUAL BENDING MACHINES

### TBX

- Single-user lightweight for the job site
- Max. portability, solid, ready to use in 2 min
- Unique X stand, foldable, on wheels

### LBT

- Construction convenience: bending, cutting, beading
- Portable, wheel locks, smooth-running
- Versatile options for clamping beam rail

### LBX

- Compact and powerful on-site bending
- Pretensioning for material type and thickness
- Optimal bending result across the working width

### TBS

- Smart segment-bending at the job site
- Tool-free adjustment, many fold shapes
- Unique X stand, light, max. portability

### UK

- Smart segment-bending, proven 10,000 times
- Combine elements without tools
- Foot pedal, frees up hands for positioning

### UKV

- Segment-bending even more powerful/versatile
- Fast and tool-free segment adjustment
- Hands stay free for precision positioning

### UKF

- Segment bending of large special forms
- Extra high standards for use – XXL freedom
- Maximum flexibility, highest comfort

### KS

- Incredibly versatile, fast, cost-effective
- Easy and convenient for creative profiles
- World's best-selling swivel bending machine

### KSV

- Award-winning, cost-effective, versatile
- Handles many materials and thicknesses
- Produces remarkable profiles

### HBM

- Special profiles only possible here
- Precise positioning of workpieces
- Simple lowering of bending beam

### HA

- Sturdy package for single-user operation
- Specially designed for thick sheets
- Ideal configuration for recurring bends

### SB50

- For the production of roof and facade shingles
- Only one work step for two 180° edges
- Time saving of approx. 70 %

## MOTORIZED BENDING MACHINES

### MBM ECT

- Smart move to motor and monitor system
- Precision reproduction of complex profiles
- Single-user operation, sturdy, time-efficient

MAX STD  
MAX ECT  
MAX CNC S-Touch

### MAX

- Motorized model with best custom versatility
- Sturdy construction, high bending capacity
- The classic for 90 % of all bending jobs

GEOMETRY  
MAX-F ECT  
MAX-F CNC

### MAX-F

- Maximum bending free space
- 14 mm free space behind the pivot point
- More space for profile geometries

MAB STD  
MAB ECT  
MAB CNC S-Touch

### MAB

- More power than MAX, better performance
- Powerful machine for roofs and exteriors
- Sturdy construction, minimal maintenance

### MAZ CNC

- Best in series production and light metal
- Speed king: outstanding productivity
- Shortest setup times, rapid bending sequences

### MAE CNC

- Economical in the industrial trade
- Most adaptable changeover system / 1-click
- Minimal setup times, versatile, compact

GEOMETRY

### MAF CNC

- Maximum bending free space – without special tools
- 14 mm free space behind the pivot point
- Low risk of collision on the bending beam

## MANUAL SHEARS

### HT

- Resiliently sturdy: lasts for generations
- Single-user operation, economical precision
- Space-saving, maintenance-free, lots of accessories

## MOTORIZED SHEARS

SMT BV  
SMT BVH  
SMT NC  
SMT NCH

### SMT

- Smallest 3-meter motorized squaring shear
- For thin sheets to strong materials
- Saves energy, space and time

MSB BV  
MSB BVH  
MSB NC  
MSB NCH

### MSB

- Small size of SMT with much more power
- Even more performance in single-user operation
- The powerful and cost-effective choice

MSC BV  
MSC BVH  
MSC NC  
MSC NCH

### MSC

- The pro for thin sheets and exterior work
- Two motors, equal power distribution
- High efficiency, min. energy consumption

## SHEARS FOR CUT-TO-LENGTH LINE SYSTEMS

### MT

- Integrated automatic shearing system
- For continuous operation in the production process
- Individually adaptable, minimal maintenance

### ST

- Shearing system with best configurability
- Integration into serial production equipment
- For many other materials besides sheet metals

## MODULAR COIL-HANDLING

### MCH

- Metal sheets are always available
- Modular design
- Customizable

## PROFILING MACHINES

### SZP

- Extra-long and very solid in ventilation work
- Straight-line profiling without distortion
- High operating cycle speed
